

## **Fastset® Musicians/DJ Utility Table Instructions and Care**

### **Warnings:**

- **Maximum weight limit 150lbs of evenly distributed weight.**
- **Never sit or stand on table. This will cause damage to the product that is not covered under warranty and the table could collapse or tip over causing you to fall.**
- **Visually check that all 4 locking buttons are properly and equally positioned in the set holes before placing objects on the table.**

**Failure to comply with these warnings could result in serious personal injury or property damage.**

### **To Set Up the Table:**

Position the table on end and pull on the cross leg to release the leg system from the locked position. Using your foot to steady the table, pull on the cross leg first in an outward motion and then in an upward motion until the set buttons lock into position on both leg pairs. Then “roll” the table onto the leg system and set to desired height (see below).

### **To Adjust the Height of the table:**

With your foot on the cross leg, squeeze the release handle and raise or lower the table to the desired height setting. Repeat the process for each side of the table. Important: Before placing objects on the table, confirm that the table is level and that the locking buttons are properly engaged.

### **To Collapse the Table:**

First lower one side of the table to the fully collapsed position, without bending over, tilt the opposite side of the table upward & toward you while squeezing the release handle. This will cause the leg system to partially collapse. Now push the legs into the table top until they “click” into the locked position. Your table is now ready for transport and storage.

### **To Care for your Table:**

Use a mixture of mild soap and water to clean your table and immediately wipe dry with a soft towel. Store your table in a dry, cool, room temperature environment. Avoid prolonged exposure to excessive heat (such as in the trunk of a car). Avoid direct sunlight. Excessive heat and direct sunlight could cause the table top to warp or bow.
